SKILLS

Programming Languages : JavaScript | Python | Java | C / C++

Web Technologies : HTML | CSS | React | Node.js | REST APIs | Tailwind CSS | Bootstrap
| Responsive Web Design | Flutter | WordPress

Databases : MongoDB | MySQL | SQLite | Mongoose

Version Control : Git | GitHub

AI & Integration : AI / LLM APIs | API Integration

Tools & Platforms : Visual Studio Code | Figma | Canva | Vercel | Docker | Unity

Operating Systems : Ubuntu

PERSONAL STATEMENT

Detail-oriented full-stack developer with hands-on experience in designing and developing end-to-end web applications using modern JavaScript and Python technologies. Proficient in React, Next.js, Node.js, Express, Flask, FastAPI, MongoDB, and REST APIs. Experienced in building secure authentication systems, designing scalable databases, and developing responsive, user-centric interfaces. Actively exploring data-driven and AI-enabled solutions using Python tools, with demonstrated leadership through mentoring, hackathons, and project ownership.

PROJECTS

NoteNest - Organize your thoughts. Simplify your life.

[GitHub Repo](#) | [Deploy Link](#)

Tech : MERN Stack

- Simplified note organization by enabling folder-based creation and management of notes.
- Improved productivity by allowing users to quickly create, edit, and delete notes in real time.
- Enhanced data accessibility by securely storing notes in a centralized and searchable system.

JeevanRakth - Connecting lives through timely blood donation.

[GitHub Repo](#) | [Deploy Link](#)

Tech : Next.js

- Eliminated manual blood availability tracking through real-time donor and request management.
- Improved emergency response by enabling quick matching of donors based on blood group and location.
- Centralized donor health and availability data to ensure safer and more reliable blood donations.

Stunning AutoMobiles - Experience automobiles like never before

[GitHub Repo](#) | [Deploy Link](#)

Tech : HTML, CSS, JavaScript, Three.js, WebGL

- Made automobile information easily accessible through a visually engaging digital platform.
- Enhanced user experience by integrating interactive 3D models for realistic vehicle visualization.
- Improved customer understanding of vehicle design and features through smooth, responsive interactions.

EDUCATION ENROLLMENT

Kalvium's UG program in CS (Software Product Engineering)

2024 – 2028

Campus: Chittoor | Bachelor's enrollment: B.Tech, Apollo University

ACHIEVEMENTS & EXTRACURRICULARS

Hackathons & Competitions:

- **Kalvium AI Hackathon (Campus Level)** – Competed as part of **Tech Syndikate**, selected in the Prototype Round among 368 participants across 88 teams, demonstrating strong innovation and technical execution
- **AI 4 Andhra Police Hackathon 2025** – Participated in a state-level AI hackathon focused on law-enforcement use cases, organized by Andhra Pradesh Police in collaboration with 4SightAI.
- **Diksuchi BuildExpo 1.0 (Mentor – UI/UX Domain)** – Mentored participants during a campus-level build expo by guiding teams on UI/UX design principles, user-centric thinking, and project presentation, contributing to improved design quality and overall project clarity.
